

PHYSICS

TAS-101/ TAS-201
(Revised w.e.f. 2004-05)

L T P
3 1 0

Unit – I : Relativistic Mechanics

Inertial and Non-inertial Frames, Michelson-Morley Experiment, Postulates of Special Theory of Relativity, Galilean and Lorentz Transformation, Length Contraction and Time Dilation, Addition of Velocities, Mass Energy Equivalence and Variation of Mass with Velocity. 6

Unit – II : Interference

Coherent Sources, Conditions of Interference, Fresnel's Biprism Experiment, Displacement of Fringes, Interference in Thin Films – Wedge Shaped Film, Newton's Rings. 4

Diffraction : Single and n-Slit Diffraction, Diffraction Grating, Raleigh's Criterion of Resolution, Resolving Power of Telescope, Microscope and Grating. 5

Unit – III : Polarization

Phenomenon of Double Refraction, Ordinary and Extra-ordinary Rays, Nicol Prism, Production and Analysis of Plane, Circularly and Elliptically Polarized Light, Fresnel Theory, Optical Activity, Specific Rotation, Polarimeter. 5

Laser : Principle of Laser Action, Einstein's Coefficients, Construction and Working of He-Ne and Ruby Laser. 3

Unit – IV : Electromagnetics

Ampere's Law and Displacement Current, Maxwell's Equations in Integral and Differential Forms, Electromagnetic Wave Propagation in Free Space and Conducting Media, Poynting Theorem. 5

Magnetic Properties of Materials

Basic Concept of Para-, Dia and Ferro-Magnetism, Langevin's Theory of Diamagnetism, Phenomenon of Hysteresis and Its Applications 4

Unit – V : X-Rays

Diffraction of X-Rays, Bragg's Law, Practical Applications of X-Rays, Compton Effect. 3

Wave Mechanics : Wave Particle Duality, de Broglie Concept of Matter Waves, Heisenberg Uncertainty Principle, Schrödinger Wave Equation and Its Applications: Particle in a Box and One Dimensional Harmonic Oscillator. 5

5. O.Svelto : Lasers
6. D.J. Griffith : Electrodynamics

CHEMISTRY

TAS-102/TAS-202

L T P
3 1 0

[Revised w.e.f. 2004-2005]

Unit – I

1. Molecular theory of diatomic heteromolecules, Bond theory of bonding in metals, Hydrogen bonding.
2. Solid state Chemistry:

Radius Ratio Rule, Space lattice (only cubes), Type of unit cell, Bragg's Law, Calculation of Density of unit cell.

One & Two Dimensional solids, graphite as two dimensional solid and its conducting properties. Fullerene & its applications.

Unit-II

1. Basic principles of spectroscopic methods. The use of UV, Visible, IR, ¹H NMR, for the determination of structure of simple organic compounds.

2. Characteristics and classification of polymers.
3. Structures of the following polymers, viz, Natural and synthetic rubbers, Polyamide and Polyester fibres, polymethylmethacrylate, poly acrylonitrile and polystyrene. A brief account of conducting polymers (polypyrrole & polythiophene) & their applications.

Unit-III

1. Stability of reaction intermediates, e.g. Carbanion, Carbocation and free radicals. Types of organic reactions, & Mechanism of nucleophilic substitution reaction.
2. Mechanism of the following reactions.
 - (i) Aldol condensation. (ii) Cannizzaro reaction (iii) Beckmann rearrangement (iv) Hofmann rearrangement, and (v) Diels-Alder reaction
3. E-Z Nomenclature. Optical Isomerism of organic Compounds containing one chiral center. Examples of optically active compounds without chirality. Conformations of butane.

Unit-IV

1. Order & Molecularity of reactions. First & Second order reactions. Energy of activation.
2. Phase Rule: Its application to one component system (Water).
3. Equilibrium Potential, electrochemical cells (galvanic & concentration cells), Electrochemical theory of corrosion & protection of corrosion.

Unit-V

1. Hardness of water, softening of water by Lenny-S process & Reverse osmosis. Treatment of boiler feed water by Calgon process, Zeolites and ion-exchange resins.
2. Classification of fuels, Coal, Biomass & Biogas. Determination of gross and net calorific values using Bomb Calorimeter.
3. Environmental pollution : Types of pollution & pollutants, Air Pollution. Formation and depletion of ozone, smog and Acid rain.

References :

1. Organic Chemistry (Morrison & Boyd)
2. Inorganic Chemistry (I.D. Lee)
3. Physical Chemistry (Barrow)
4. Environmental chemistry (Manahan)

PROFESSIONAL COMMUNICATION

TAS-103

[Effective from the session : 2004-05]

Unit – I : Technical Communication

8

Nature; Origin and Scope; Feature and General Writing; Significance; Style: Objective Style as Contrary to Literary Composition.

Forms of Technical Communication:

Reports: Types, Significance, Structure & Style of Report;

Writing of Reports: Project, Thesis, Dissertation Writing;

Technical Paper & Scientific Article Writing: Elements, Methods & Technical Objectives;

Technical Proposal: Nature, Divisions, Kinds, Uses.

Unit-II : Pre-Requisites of Technical Written Communication

9

Vocabulary Building : Homophones (Words Similar in sound but different in Meanings); Word-formation; One-Word substitute; New & Select Vocabulary Building (about 500 words)

Functional Grammar : Patterns and Correct usage (Parts of speech); Syntax Concord; Prepositions; Articles.

Requisites of Good Sentence and Paragraph Writing: Requisites of Good Sentence Writing; Paragraph Writing; Unity, Coherence and Emphasis; Development of Paragraph: Inductive Order, Deductive Order, Spatial, Linear, Chronological Orders etc. with Emphasis on Argumentative & Expository Writing.

Unit : III : Business Correspondence: Principles; Features; Sales and Credit Letters: Letters of Enquiry, Quotation, Order, Claim, Complaint and Adjustment letters, Bio-Data Making, Resumes/Job Application Processing.

7

Unit-IV : Language Learning Through Thematic and Value based Critical Reading (Non-Detailed Text Study) :

A Study of following Value-Oriented Essays:

A.L.Basham	:	The Heritage of India
S. Radhakrishnan	:	<i>The Gandhian Outlook</i>
Francis Bacon	:	<i>Of Studies</i>
J.B. Priestley	:	Making Writing Simple
Virginia Woof	:	How should one Read a Book
R.K. Narayan	:	<i>A Bookish Topic</i>
C.E.M. Joad	:	The Civilization of Today

Study of following Short Stories for making the Students acquaint with the styles of great Writers of World:

O.H. Henry	:	The Gift of the Magi
R.N. Tagore	:	The Renunciation
Katherine Mansfield	:	<i>The Fly</i>
A.P. Chekhov	:	<i>The Lament</i>
M.R. Anand	:	The Barber's Trade Union
Ruskin Bond	:	The Eyes Are Not Here
D.H. Lawrence	:	The Rocking Horse Winner
Ernest Hemingway	:	The Capital of the World

Unit-V : Dimensions of Spoken English: Using English Language Laboratory :

6

Stress, Intonation, Rhythm, Phonemes, Allophones, Phonetic Transcription, Listening, Reading & Comprehension of Speech and Reproduction of Response.

MATHEMATICS-I

TAS-104

Unit - I : Matrices

9

Elementary row and column transformation, Rank of matrix, Linear dependence, Consistency of linear system of equations, Characteristic equation, Caley-Hamilton Theorem, Eigen values and eigen vectors, Diagonalisation, Complex and unitary matrices .

Unit - II : Differential Calculus-I

8

Leibnitz theorem, Partial differentiation, Eulers theorem, Curve tracing, Change of variables, Expansion of function of several variables

Unit - III : Differential Calculus-II

7

Jacobian, , Approximation of errors, Extrema of functions of several variables, Lagranges method of multipliers (Simple applications).

Unit - IV : Multiple Integrals

7

Double and triple integral, Change of order, Change of variables, Beta and Gamma functions, Application to area, volume, Dirichlet integral and applications.

Unit - V : Vector Calculus

7

Point functions, Gradient, divergence and curl of a vector and their physical interpretations, Line, Surface and Volume integrals, Greens, Stokes and Gauss divergence theorem.

ELECTRICAL ENGINEERING

TEE-101/TEE-201

(Revised : with effect from session 2002-2003)

L T P
3 1 0

Unit-I

1. Steady State Analysis of A.C. Circuits :

Sinusoidal and phasor representation of voltage and current: single phase a.c. circuit-behaviour of resistance, inductance and capacitance and their combination in series & parallel and power factor, series parallel resonance-band width and quality factor : magnetic circuit. 8

Unit-II

2. D.C. Network Theory :

Circuit theory concepts-Mesh and node analysis.

Network Theorems- Super-position theorem. Thevenin's theorem, Norton's theorem, Maximum Power Transfer theorem, Star Delta transformation.

3. Measuring Instruments:

Construction and principle of operation of voltage and current measuring instruments; introduction to power and energy meters. 8

Unit-III

4. Three Phase A.C. Circuits :

Star-Delta connections, line and phase voltage/current relations, three phase power and its measurement.

5. Transformer :

Principle of operation, types of construction, phasor diagram, equivalent circuit, efficiency and voltage regulation of single phase transformer, O.C. and S.C. tests. 9

Unit-IV

6. D.C. Machines

Principle of electromechanical energy conversion, types of d.c. machines, E.M.F. equation, Magnetization and load characteristics, losses and efficiency, speed control d.c. motors, applications.

7. Three phase Synchronous Machines :

Principle of operation and application of synchronous motor. 8

Unit-V

8. Three phase induction Motor

Principle of operation, types and methods of starting, slip-torque characteristics, applications.

9. Single phase Induction Motor :

Principle of operation, methods of starting. 7

MECHANICAL ENGINEERING

TME-101/201

[Effective from the session : 2004-05]

A. THERMODYNAMICS

Unit – I : Fundamental Concepts and Definitions

Definition of thermodynamics, system, surrounding and universe, phase, concept of continuum, macroscopic & microscopic point of view. Density, specific volume, pressure, temperature. Thermodynamic equilibrium, property, state, path, process, cyclic process, Energy and its form, work and heat, Enthalpy. 3

Laws of thermodynamics

Zeroth law: Concepts of Temperature, zeroth law. 1

First law: First law of thermodynamics. Concept of processes, flow processes and control volume, Flow work, steady flow energy equation, Mechanical work in a steady flow of process. 2

Second law: Essence of second law, Thermal reservoir, Heat engines. COP of heat pump and refrigerator. Statements of second law. Carnot cycle, Clausius inequality. Concept of Entropy. 3

Unit – II : Properties of steam and thermodynamics cycles:

Properties of steam, use of property diagram, Steam-Tables, processes involving steam in closed and open systems. Rankine cycle.	4
Introduction to I.C. Engines-two & four stroke S.I. and C.I. engines. Otto cycle, Diesel cycle.	3

B. MECHANICS AND STRENGTH OF MATERIALS

Unit-III : Force system and Analysis

Basic concept: Laws of motion. Transfer of force to parallel position. Resultant of planer force system. Free Body Diagrams, Equilibrium and its equation.	4
---	---

Friction: Introduction, Laws of Coulomb friction, Equilibrium of bodies involving dry friction-Belt Friction.	2
--	---

Unit-IV : Structure Analysis

Beams: Introduction, Shear force and Bending Moment, shear force and Bending Moment Diagram for statically determinate beams.	4
--	---

Trusses: Introduction, Simple Trusses, Determination of Forces in simple trusses members, methods of joints and method of section.	3
---	---

Unit-V : Stress and Strain Analysis

Simple stress and strain: Introduction, Normal shear stresses, stress-strain diagrams for ductile and brittle materials, Elastic constants, one dimensional loading of members of varying cross sections, strain Energy.	3
---	---

Compound stress and strains: Introduction, state of plane stress, Principal stress and strain, Mohr's stress circle.	2
---	---

Pure Bending of Beams: Introduction, Simple Bending theory, Stress in Beams of different cross sections.	2
---	---

Torsion: Introduction, Torsion of Shafts of circular section, Torque and Twist, Shear stress due to Torque.	2
--	---

ELECTRONICS ENGINEERING

TEC-101/ TEC-201

[Effective from the session : 2004-05]

Unit – I

Semiconductor materials and properties

Group-IV materials, Covalent bond, electron-hole concepts	1
Basic concepts of energy bands in materials, concept of forbidden gap	2
Intrinsic and extrinsic semiconductors, donors and acceptors impurities	1

Junction diode

p-n junction	1
depletion layer	1
v-i characteristics, diode resistance, capacitance	1
diode ratings (average current, repetitive peak current, non-repetitive current, peak-inverse voltage).	1

Unit-II

Diode Applications

rectifiers (half wave and full wave)	1
calculation of transformer utilisation factor and diode ratings,	1
filter (C-filter), calculation of ripple factor and load regulation	2
clipping circuits, clamping circuits, voltage multipliers	2

Breakdown diodes

breakdown mechanisms (zener and avalanche)	1
--	---

breakdown characteristics, zener resistance, zener diode ratings	1
zener diode application as shunt regulator	2
Unit-III	
Bipolar Junction Transistor	
Basic construction, transistor action	1
CB, CE and CC configurations, input/output characteristics	2
Biasing of transistors-fixed bias, emitter bias, potential divider bias, comparison of biasing circuits	2
Transistor Amplifier	
Graphical analysis of CE amplifier, concept of voltage gain, current gain	2
h-parameter model (low frequency), computation of A_i , A_v , R_i , R_o of single transistor CE and CC amplifier configurations.	2
Unit-IV	
Field Effect Transistor	
JFET: Basic construction, transistor action, concept of pinch off, maximum drain saturation current, input and transfer characteristics, characteristic equation CG, CS and CD configurations, fixed-, self-biasing	3
MOSFET: depletion and enhancement type MOSFET-construction, operation and characteristics.	2
Computation of A_v , R_i , R_o , of single FET amplifiers using all the three configurations	1
Unit-V	
Switching theory and logic design	
Number systems, conversion of bases	5
Boolean algebra, logic gates, concept of universal gate, canonical forms.	2
Minimisation using K-map	1
Operational Amplifiers	
Concept of ideal operational amplifiers, ideal op-amp parameters, inverting, non-inverting and unity gain amplifiers, adders, difference amplifiers, integrators	2
Books and reference:

INFORMATION TECHNOLOGY

TIT-101/TIT-201

[Effective from the Session : 2004-05]

L T P
3 1 0

Unit – I : Fundamental Concept of Information

Information Concept and Processing:

Definition of information, Data Vs Information, Introduction to Information representation in Digital Media, Text, image, graphics, Animation, Audio, Video etc., Need, Value and Quality of information, Concept of Information Entropy, Shannon's Principles, Entropy of Information, use of Entropy in Coding, Static & Dynamic codes, Category and Level of Information in Business Organization.

Information Representation:

Information Content, Entropy, Data Compression, Shannon Fano, Huffman Coding, Extended Huffman Codes, Arithmetic Coding, LZ78, LZW coding, Introduction to JPEG, MPEG, MHEG and other IT Industry Standards.

Unit-II : Concepts in Computer & Programming

Computer Appreciation:

Definition of Electronic Computer, History, Generations, Characteristic and Application of Computers, Classification of Computers, RAM/ROM, Computer Hardware, CPU, Various I/O devices, Peripherals, Storage Media, Software Definition, Role and Categories, Firmware and Humanware.

Programming Language Classification & Program Methodology:

Computer Languages, Generation of Languages, Translators-Interpreters, Compiler/Interpreters, Compilers, Flow, Charts, Dataflow Diagram, Assemblers, Introduction to 4GLs, Software Development Methodology, Life Cycles, Software Coding, Testing, maintenance, ISO, CMM standards for IT industry.

UNIT : III : Digital Devices and Basic Network Concepts

Digital Fundamentals:

Various codes, decimal, binary, hexa decimal conversion, floating numbers gates, flip flops, adder, multiplexes, need for Data Transmission over distances, Types of Data Transmission, Media for Data Transmission, Modulation, AM, FM, Digital Modulation, Multiplexing of Signals

Data Communication & Networks:

Computer Networks, Networking of computers- Introduction of LAN and WAN. Network Topologies, Basic Concepts in Computer Networks, Client-server Architecture, ISDN, ATM, Token based protocol, CSMA/CD, Mobile Communication.

UNIT-IV : Internet and Web Technologies

Internet & World Wide Web:

Hypertext Markup Language, DHTML, WWW, Gopher, FTP, Telnet, Web Browsers, Net Surfing, Search Engines, Email, ISP, EDI, E-Commerce, Public Key Private Key, Safety of Business Transaction on web.

Web Technologies:

Elementary Concepts of E-Commerce, Basic Infrastructures for E-Commerce, Electronic Token, Security Threats, Electronic Payment Systems, Digital Signatures, Network, Security, Firewall, Introduction to Web Technologies.

UNIT-V : Concepts in Operating System, Office Tools and Data Management

Introductory concepts in operating system & Data Management:

Elementary Concepts in Operating System, textual Vs GUI Interface, Introduction to DOS, MS Windows, MS office Tools, MS WORD, MS EXCEL, MS Power Point, Tools for Data Management, Basics of Database management system, Introduction to basic Commands of Dbase, Foxpro, SQL Etc.

IT Industry Trends, Careers and Applications in India:

Scientific, Business, Educational and Entertainment Application, Industry Automation, Weather Forecasting, Awareness of Ongoing IT projects in India NICNET, BRNET etc. Application of IT to other Areas E Commerce, electronic governance, Multimedia, Entertainment.

ENVIRONMENTAL STUDIES

TES - 201

**L T P
3 1 0**

Unit-I :

The Multidisciplinary nature of environmental studies

2

Definition, scope and importance, Need for public awareness

Natural Resources

6

Renewable and non-renewable resources

Natural resources and associated problems.

- (a) Forest resources: Use and over-exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forests and tribal people.
 - (b) Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.
 - (c) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.
 - (d) Food resources: World food problem, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies.
 - (e) Energy resources: Growing energy needs, renewable and non renewable energy sources, use of alternate energy sources. Case studies.
 - (f) Land resources: Land as resource, land degradation, man induced landslides, soil erosion and desertification.
- Role of an individual in conservation of natural resources.

- Equitable use of resources for sustainable lifestyles.

Unit-2 : Ecosystems

6

- Concept of an ecosystem.
- Structure and function of an ecosystem.
- Producers, consumers and decomposers.
- Energy flow in the ecosystem.
- Ecological succession.
- Food chains, food webs and ecological pyramids.
- Introduction, types, characteristic features, structure and function of the following ecosystem:
 - (a) Forest ecosystem
 - (b) Grassland Ecosystem
 - (c) Desert ecosystem
 - (d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

Unit-3 : Biodiversity and its conservation

7

Introduction- Definition : genetic, species and ecosystem diversity, Biogeographical classification of India, Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values, Biodiversity at global, National and local levels, India as a mega-diversity nation, Hot-spots of biodiversity, Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts, Endangered and endemic species of India, Conservation of biodiversity: In-situ Ex-situ conservation of biodiversity.

Unit-4 : Environmental Pollution

8

Definition

- Causes, effects and control measures of-
 - (a) Air Pollution.
 - (b) Water Pollution.
 - (c) Soil Pollution
 - (d) Marine Pollution.
 - (e) Noise Pollution.
 - (f) Thermal Pollution.
 - (g) Nuclear hazards.
- Solid waste Management: Causes, effects and control measures of urban and industrial wastes.
- Role of an individual in prevention of pollution.
- Pollution case studies.
- Disaster management: floods, earthquake, cyclone and landslides.

Unit-5: Social Issues and the Environment

5

From Unsustainable to Sustainable development, Urban problems related to energy, Water conservation, rain water harvesting, watershed management, Resettlement and rehabilitation of people; its problems and concerns. Case Studies, Environmental ethics: Issues and possible solutions, Wasteland reclamation, Consumerism and waste products, Environment Protection Act, Air (Prevention and Control of Pollution) Act, Water (Prevention and control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act, Issues involved in enforcement of environmental legislation, Public awareness.

Human Population and the Environment

4

Population growth, variation among nations, Population explosion- Family Welfare Programme, Environment and human health, Human Rights, Value Education., HIV/AIDS, Women and Child Welfare, Role of Information Technology in Environment and human health, Case Studies.

Suggested Field work

Visit to local area to document environmental assets-river/forest/grassland/hill/mountain, Visit to a local polluted site-Urban/Rural /Industrial / Agricultural, Study of common plants, insects, birds, Study of simple ecosystems-pond, river, hill slopes etc

MATHEMATICS II

TAS-204

- Unit - I : Differential Equations** 8
 Ordinary differential equations of first order, Exact differential equations, Linear differential equations of first order, Linear differential equations of nth order with constant coefficients, Complementary functions and particular integrals, Simultaneous linear differential equations, Solutions of second order differential equations by changing dependent and independent variables, Method of variation of parameters, Applications to engineering problems (without derivation).
- Unit - II : Series Solutions and Special Functions** 8
 Series solutions of ODE of 2nd order with variable coefficients with special emphasis to differential equations of Legendre, and Bessel . Legendre polynomials, Bessels functions and their properties.
- Unit - III : Laplace Transform** 7
 Laplace transform, Existence theorem, Laplace transform of derivatives and integrals, Inverse Laplace transform, Unit step function. Dirac delta function, Laplace transform of periodic functions, Convolution theorem, Application to solve simple linear and simultaneous differential equations.
- Unit - IV : Fourier Series and Partial Differential Equations** 8
 Periodic functions, Trigonometric series, Fourier series of period 2π , Eulers formulae, Functions having arbitrary period, Change of interval, Even and odd functions, Half range sine and cosine series.
 Introduction of partial differential equations, Linear partial differential equations with constant coefficients of 2nd order and their classifications - parabolic, elliptic and hyperbolic with illustrative examples.
- Unit - V : Applications of Partial Differential Equations** 7
 Method of separation of variables for solving partial differential equations, Wave equation up to two-dimensions, Laplace equation in two-dimensions, Heat conduction equations up to two-dimensions, Equations of transmission Lines.

PHYSICS PRACTICALS

TAS-151/TAS-251
 (Revised w.e.f. 2004-05)

L T P
 2 1 0

List of Experiments (Any Ten)

1. To determine the wavelength of monochromatic light by Newton's ring.
2. To determine the wavelength of monochromatic light with the help of Fresnel's biprism.

3. To determine the focal length of two lenses by nodal slide and locate the position of cardinal points.
4. To determine the specific rotation of cane sugar solution using half shade polarimeter.
5. To determine the wavelength of spectral lines using plane transmission grating.
6. To determine the specific resistance of the material of given wire using Carey Foster's bridge.
7. To determine the variation of magnetic field along the axis of a current carrying coil and then to estimate the radius of the coil.
8. To verify Stefan's Law by electrical method.
9. To calibrate the given ammeter and voltmeter.
10. To study the Hall effect and determine Hall coefficient, carrier density and mobility of a given semiconductor material using Hall-effect set up.
11. To determine energy band gap of a given semiconductor material.
12. To determine E.C.E. of copper using Tangent or Helmholtz galvanometer.
13. To draw hysteresis curve of a given sample of ferromagnetic material and from this to determine magnetic susceptibility and permeability of the given specimen.
14. To determine the ballistic constant of a ballistic galvanometer.
15. To determine the viscosity of a liquid.

Note : Additional experiments may be added based on contents of syllabus.

CHEMISTRY PRACTICALS

TAS-152/TAS-252

LIST OF EXPERIMENTS

[Revised w.e.f. 2004-2005]

L T P

0 0 2

1. Determination of alkalinity in the given water sample.
2. Determination of temporary and permanent hardness in water sample using EDTA as standard solution.
3. Determination of available chlorine in bleaching powder.
4. Determination of chloride content in the given water sample by Mohr's method.
5. Determination of iron content in the given ore by using external indicator
6. pH-metric titration.
7. Determination of Equivalent weight of Iron by the chemical displacement method. The equivalent weight of copper is 63.5

(Note : the procedure to be followed in carrying the above experiment is given as annexure)
8. Viscosity of an addition polymer like polyster by Viscometer.
9. Determination of iron concentration in sample of water by colorimetric method. The method involves the use of KCNS as colour developing agent and the measurements are carried out at λ_{\max} 480 nm.

Note : The general procedure of estimation is given on pp653-8 of the textbook of Quantitative Chemical Analysis by A.I. Vogel 6th Edition, Publisher : Pearson education Ltd. 2000)
10. Element detection & functional group identification in organic compounds

Annexure

In this experiment we will determine the equivalent weight of Iron, which displaces one equivalent of copper (63.5 g) from a solution containing copper ions.

Procedure: Clean a sample of iron (strip measuring 3.5cm×1.5cm) with a sand paper and weigh it accurately. Place it in a clean beaker (250ml) and pour into it 100ml of CuSO₄ solution of known strength (~ N/10) Allow the strip to stand in the beaker for about 30 minutes. Carefully withdraw the strip of iron (from the beaker) with a forceps and place it on a porcelain plate contained in a desiccator (using CaCl₂ as a desiccant). The quantity of copper sulphate remaining in solution – after the chemical displacement, is estimated by Iodometric titration method. The dried strip of iron (containing the deposited copper) is then carefully weighed.

Observations:

Weight of iron strip =g

Wt. Of iron strip + copper =g

(after drying)

wt. of copper deposited on iron strip \Rightarrow

Initial conc. of cu- final conc. of cu. (determined by titration)

The weight of iron, which goes into solution(as Fe So₄)

\Rightarrow (Initial weight of iron strip + weight of deposited copper) - weight of iron strip along with copper (after drying)

$$\frac{\text{Eq.wt. of copper}}{\text{Eq. Wt. of Iron}} (63.5) = \frac{\text{Wt. of Copper Deposited}}{\text{Wt. of Fe}_{(s)} \text{ (going into solution)}}$$

The Eq. Wt. of Fe = ?

The % error involved in the experiment =.....

ELECTRICAL ENGINEERING LAB

TEE-151 / TEE 251

L T P
0 0 2

List of Practicals

A minimum of 10 experiments from the following :

1. Verification of Network Theorems.
2. Study of diode characteristics.
3. To study a half wave and full wave rectifier circuit with and without capacitor filter and determine the ripple factor.
4. Determination of Common base and common emitter characteristics of a transistor.
5. Study of phenomenon of resonance in RLC series circuit.
6. Measurement of power in a three phase circuit by two wattmeter method.
7. Measurement of efficiency of a single phase transformer by load test.
8. Determination of parameters and losses in a single phase transformer by OC and SC test.
9. DC generator characteristics.
10. Speed control of dc shunt motor.
11. Study running and reversing of a three phase induction motor.
12. Study of a single phase energy meter.
13. To study the various logic gate (TTL).

Additional experiments may be added based on contents of syllabi.

MECHANICAL ENGINEERING LAB

TME-151 / TME 251

L T P
0 0 2

List of Practicals

1. Study of boiler models - Babcock Wilcox, Lancashire and Locomotive.
2. Study of Steam engine and steam turbine models.
3. Study of 2-stroke and 4-stroke I.C.E. models.
4. Study of Fiat engine and/ or Diesel engine prototype.

5. Study of a vapour compression Refrigeration unit tutor/refrigerator.
6. Study of a window type air conditioner.
7. To conduct the tensile test on a UTM and determine ultimate Tensile strength, percentage elongation for a steel specimen.
8. To conduct the compression test and determine the ultimate compressive strength for a specimen.
9. To conduct the Impact test (Izod / charpy) on the Impact testing machine and to find the impact strength.
11. To determine the hardness of the given specimen using Brinell / Rockwell / Vicker testing machine.

COMPUTER PROGRAMMING LAB

TCS 151 / TCS 251

L T P
0 0 2

List of Practicals

1. Practice of all internal and External DOS Commands
2. Write simple batch program
3. Giving exposure to Windows environment
4. File and program management in windows
5. Practice of all UNIX commands
6. Write simple shell script
7. Introduction to text editing and word processing
8. Exposure to advance feature supported by some editors
9. Net Surfing
10. Creation and usage of E-mail account
11. Write small program using C language
12. Handling of data structure in C
13. Familiarizing mail account using PINE, deleting, creating folder/ mail-messages, adding signature, creating directory of addresses.

Note : List may be modified according to new software available.

WORKSHOP PRACTICE

TWS-151/251

L T P
0 0 2

1. **Carpentry Shop:** 1. Study of tools and operation and carpentry joints. 2. Simple exercise using jack plain. 3. To prepare half-lap corner joint, mortise and tennon joints. 4. Simple exercise on woodworking lathe.
2. **fitting Bench Working Shop :** 1. Study of tools and operations 2. Simple exercises involving filling work. 3. Making perfect male-female joint 4. Simple exercise involving drilling/tapping/dieing.
3. **Black Smithy Shop :** 1. Study of tools and operations 2. Simple exercises based on black smithy operations such as upsetting, drawing down, punching, bending, fullering & swaging.
4. **Welding Shop :** 1. Study of tools and operations . 2. Simple butt joint. 3. Lap joint. 4. oxy acetylene welding.
5. **Sheet metal shop :** 1.Study of tools and operations. 2. Making funnel complete with soldering. 3. Fabrication of tool box, tray, electrical panel box etc.
6. **Machine Shop :** 1. Study of tools and operations. 2. Plane turning. 3. Step turning. 4. Taper turning 5. Threading. 6. Single point cutting tool grinding.

ENGINEERING GRAPHICS

TCE 151

L T P
0 0 2

1. **Introduction**
Graphics as a tool to communicate ideas, Lettering and dimensioning, Construction of geometrical figures like pentagon and hexagon. 2
2. **Orthographic Projection**
Principles of orthographic projections, Principal and auxiliary planes, First and Third angle projections. 1
Projection of points. Pictorial view. 1
Projection of lines parallel to both the planes. Parallel to one and inclined to other, Inclined to both the planes. Application to practical problems. 3
Projection of solid in simple position, Axis or slant edge inclined to one and parallel to other plane, Solids lying on a face or generator on a plane. 2
Sectioning of solids lying in various positions, True shape of the section. 2
Development of lateral surfaces, sheet metal drawing. 1
3. **Isometric Projection**
Principles of isometric projection, Isometric projection using box and offset methods. 2

TAS-253 : COMMUNICATION LAB (ENGLISH)

- (i) Orientation to Speech Sounds through International Phonetic Alphabets (I.P.S.) : British Received Pronunciation.
- (ii) Speech Drills with Emphasis on Articulatory Phonetics, Place and Manner.

LIST OF PRACTICALS

Stress in Speech: Based on Accentual Patterns.

Intonation-Pattern-Practice: Rising, Falling and Level-Tones.

Rhythm in Speech-Practices On Strong and Weak-form Words.

Individual Conferencing / Speaking along with Quizzes.

Conversational Skills for Interview/ Seminars / Workshops with Emphasis on Kinesis along with Promotion of Phonetic-Script-Skills.

Group-Discussion: Practices based on Accurate & Current Grammatical Patterns.

Official / Public Speaking : Practices based on Mechanics of Articulation.

Theme Presentation-Practices Based on Linguistic Patterns.

Developing Argumentative Skills/ Role-Play Presentations with Proper Rhythmic Stress.

Testing comprehension : Reading and Listening Exercises with the use of Audio-Visual Aids.

Audience-based, Effective Speech Production (Elocution)

TAS 301: MATHEMATICS III

L : T: P
3 : 1: 0

Unit - I : Integral Transforms

8

Fourier integral, Fourier complex transform, Fourier sine and cosine transforms and applications to simple heat transfer equations.

Z – transform and its application to solve difference equations.

Unit - II : Functions of a Complex Variable - I	9
Analytic functions, C-R equations and harmonic functions, Line integral in the complex plane, Cauchy's integral theorem, Cauchy's integral formula for derivatives of analytic functions, Liouville's theorem, Fundamental theorem of algebra.	
Unit - III : Functions of a Complex Variable - II	8
Representation of a function by power series, Taylor's and Laurent's series, Singularities, zeroes and poles, Residue theorem, evaluation of real integrals of type $\int_0^{2\pi} f(\cos\theta, \sin\theta) d\theta$ and $\int_{-\infty}^{+\infty} f(x) dx$, Conformal mapping and bilinear transformations.	
Unit - IV : Statistics and Probability	8
Moments, Moment generating functions, Skewness, Kurtosis, Correlation and Regression, Binomial distribution, Poisson distribution, Normal distribution.	
Unit - V : Curve Fitting and Solution of Equations	5
Method of least squares and curve fitting of straight line and parabola, Solution of cubic and bi-quadratic equations.	

TCY-301: CHEMISTRY-I

L : T: P
3 : 1: 0

Unit -I	
IUPAC nomenclature: E-Z,R-S bicyclic alkanes , hetrocycles aliphatic and aromatic compounds: Application of Grignard reagent, lithium aluminum hydride.	
	7
Unit-II	
Stereoisomerism: Geometrical isomerism with and without chirality, concept of aromaticity directive influence of substitute.Criteria & techniques of purity of compounds. Melting point ,Boiling point , recrystallisation , various distillations.	
	7
Unit-III	
Reactions , Synthesis & mechanism: Hydrocarbons including cyclic , alcohol, phenols , aldehyde& ketones, carboxylic acids & their derivatives, halides , nitro, amino & diazo compounds.	
	10
Unit-IV	
Conformational analysis: Various terms , conformation analysis of ethane , cyclohexane & 1,2 disubstituted cyclohexane Heterocyclic: Classification, preparation and properties of pyridine.	
	10
Unit-V	
Bimolecules: Structures & reactions of mono & disaccharides, proteins & natural polymers.	
	6

TCH-307: FLUID FLOW AND SOLID HANDLING

L : T: P
3 : 1: 0

Unit-I	
Solids and Their Handling	
Properties of solids ,screening, industrial screening equipment. Determination of particle size, screen analysis, size reduction of solids,stages of reduction , operating variables, intermediate and fine size reduction, power requirement and mechanism.	
Power driven machines: Crushers, grinders, and conveyors.	
	8
Unit -II	
Filtration: Theory, continuous and batch equipments. Flow of solids through fluids, classification and sedimentation.	
	8
Unit - III	
Fluid flow:	
Properties of fluids	
Fluid statics: Euler's equation, Hydrostatic Law and Pressure Measurement	
Transport of fluids, energy relationships, pipe fittings, minor losses in pipe flow	
	8
Unit IV	
Flow measurements: Orifice meter. Nozzle and venturi meters, rotameter and pitot tube.	
	8

Unit V

Pumping and compressing: reciprocating pumps, rotary pumps, centrifugal pumps and blowers. Introduction to fluidization. 8

1. To Determine size distribution of sample crushed in a dodge crusher
2. To Determine efficiency of crushing of a roll crusher.
3. To determine surface area volume of a sample using screen analysis.
4. To Determine constants of filtration in case of rotary filter.
5. To Determine terminal velocity in case of hindered settling in sedimentation.
6. To Calibrate orificemeter
7. To Calibrate venturimeter.
8. To Calibrate rotameter.
9. To Verify Bernoulli equation.

TOT-301 CHEMISTRY OF OILS & ALLIED PRODUCTS

L : T: P
3 1 0

Unit-I

General introduction to oils, fats, waxes, mineral oils, essential oils, their sources, composition, structures and classification. Constituents of natural fats Glycerides and fatty acids, their nomenclature, classification and principle sources; theories of glyceride structure. 08

Unit –II

Physico-chemical characteristics of natural oils, fats and their fatty acids: Oiliness and viscosity, density and expansibility, melting point, thermal properties- smoke, fire, and flash points, Boiling point; solubility and miscibility, refractive index and molecular refraction, absorption spectra; electrical properties. Acid value, saponification value, Iodine value, thiocyanogen value, diene value, acetyl and hydroxyl value Riechert Miessel and Polensky values, and Kirshner value, Peroxide Value, Anisidine Value, Krisma Value, Properties of Allied Products e.g. Surface active properties. 12

Unit –III

Brief introduction to chemical & Biochemical reactions of fats and fatty acids: esterification, interesterification saponification, hydrolysis: reactions involving the carboxyl groups e.g., formation of metal soaps: nitrogen derivatives, acid chlorides, anhydrides etc.: alkoxylation, pyrolysis: reactions in the fatty acid chain; hydrogenation, dehydrogenation, halogenation, addition of sulphur, phenols, cresols, hydrogen sulphide and mercaptans: sulphonation and sulphonation and miscellaneous addition to the double bonds: chemical and atmospheric oxidation. 08

Unit - IV

Non-glyceride components of natural fats: phosphatides, sterols, gossypol, carotenoids, hydrocarbons, coloring matter, vitamins and antioxidants, Fatty Alcohols, Sterols, Tocopherols, Triterpene Alcohols Waxes etc. Gossypol, Sesamol and Sesamoline, Flavoring compounds. 04

Unit – V

Some minor important constituents of oilseeds: ricin, sinigrin, linamarine, saponin, allyl iso thiocyanate, gossypol, sesamol and sesamoline. Adulteration tests for vegetable and animal fats and oils and their chemistry. 08

Reference Book

1. Bailey's Industrial Oil and Fat, Part--I -V By Bailey
2. A text book of oil and fat analysis By Cocks & Reid
3. An introduction to chemistry & Biochemistry of Fatty acids & their glyceride By F.D. Gunstone

TME-307 MECHANICS OF SOLIDS

L : T: P
3 : 1: 0

Unit-I

Simple stress and strain ; Normal stress and strain; Elastic materials- Hook's Law; Modulus of elasticity- Young's modulus; Tensile test, Stress-Strain curves for important engineering materials; Ductile and Brittle materials; Poisson's ratio and its application to a two-dimensional stress system; Shear stress and strain; Modulus of rigidity; Allowable working stress, Factor of safety. 8

Unit-II

Stress concentration factor; Toughness; Creep and fatigue; Compound bars subjected to external loads; Simple bending theory; Shear force and Bending moment diagram for beams carrying concentrated and distributed loads; Points of contraflexure; Neutral axis; Section modulus; Second moment of area. 8

Unit-III

Slope and deflection of beams; Direct integration method; Macaulay's method; Energy method; Simple torsion theory; Polar record moment of area shear stress and strain in shafts; Torsion of hollow shafts; Torsion of thin walled tubes. 8

Unit-IV

Strain energy under uniaxial tension and compression; Biaxial state of stresses; Stresses on oblique planes; Principal stresses and strains; Mohr's stress circle; Bulk modulus; Volumetric strain. 8

Unit-V

Pressure vessels; Thin and thick cylinders; Hoop and longitudinal stresses; Lame's theory; Buckling of columns: Euler's theory. 6

TCH-357 FLUID MECHANICS LAB

L : T: P
0 : 0 : 3

1. To determine experimentally the metacentric height of a ship model.
2. To verify the momentum equation experimentally.
3. To determine the coefficient of discharge of an orifice (or a mouth piece) of a given shape. Also to determine the coefficient of velocity and the coefficient of contraction of the orifice (or the mouth piece.).
4. To plot the flow net for a given model using the concept of electrical analogy.
5. To measure surface tension of a liquid.
6. To calibrate an orifice meter and study the variation of the coefficient of discharge with the Reynolds number.
7. To verify Darcy's law and to find out the coefficient of permeability of the given medium.
8. To study the transition from laminar to turbulent flow and to determine the lower critical Reynolds number.
9. To study the velocity distribution in a pipe and also to compute the discharge by integrating the velocity profile.
10. to study the variation of friction factor, 'f' for turbulent flow in smooth and rough commercial pipes.
11. To determine the loss coefficients for the pipe fittings.
12. To study the flow behaviour in a pipe bend and to calibrate the pipe bend for discharge measurement.
13. To study the boundary layer velocity profile and to determine boundary layer thickness and displacement thickness. Also to determine the exponent in the power law of velocity distribution.

TCY-351 CHEMISTRY-I LAB

L : T: P
0 : 0 : 3

1. Identification of liquid organic compounds.
2. Identification of two organic compounds (one water soluble and one water insoluble) in a mixture.
3. Minor estimation of phenol, glucose & aniline.
4. Preparation of p- Nitroacetanilide from Acetanilide.
5. Paper chromatography of organic compounds
6. Thin layer chromatography: Determination of R_f value & Separation of compounds.

Chemical Kinetics : Kinetics of parallel side, opposite, consecutive and chain reactions, fast reactions fundamental aspect of kinetics of reactions in solution.

Unit-II

Catalysis : Acid basis catalysis, Enzyme catalysis, heterogeneous reactions. 6

Unit-III

Surface chemistry: adsorption, adsorption isotherms , surface tension and its determination .
Colloids chemistry : General preparation properties and classification hydrophilic and lyophobic sols.
Electrical and technique properties of solutions. 7

Unit-IV

Thermodynamic: Application of I st and II nd law of thermodynamics to chemical processes. Thermodynamic functions, F.A.S.K. their determination relations and physical significance

Unit-V

Colligative properties : Lowering of B>P. elevation in B.P . depression in F.P. Osmotic pressure and relation with molecular weight.
Electro chemistry : Cells their classification liquid junction potential , E.M.F. and thermodynamic functions relations. Application of E.M.F. measurements activity coefficient concept.

TCH-401: HEAT TRANSFER OPERATIONS

L : T: P
3 : 1: 0

Unit-I

Introduction to heat transfer and general concepts of heat transfer by conduction , convection and radiation.

Conduction: Basic concepts of conduction in solids, liquids and gases , steady state temperature fields and one dimensional conduction without heat generation e.g. through plane walls, cylindrical and spherical surfaces , composite layers etc. Insulation materials , critical and optimum insulation thickness. Extended surfaces, fins and their practical applications . Introduction to unsteady state heat transfer. 8

Unit-II

Convection: Fundamentals of convection , basic concept of convection and definitions . Natural and forced convection, hydrodynamic and thermal boundary layers, laminar and turbulent heat transfer inside and outside tubes . Dimensional analysis, determination of individuals and overall heat transfer coefficients and their temperature dependence, heat transfer in molten metals. 8

Unit-III

Heat transfer with phase change : Condensation of pure and mixed vapors, film wise and drop wise condensation ,loading in condensers and basic calculation on condensers, heat transfer in boiling liquids, boiling heat transfer coefficients. 8

TCH - 407 : INDUSTRIAL FUELS AND PROCESS CALCULATIONS

L : T: P
3 : 1: 0

Unit -I

Fuels: Origin, chemical composition, classification, storage, and general uses of industrial fuels. 8

Unit II

Types of solid fuels , proximate and ultimate analysis of coal, calorific values of fuels, specification of fuel oil. Types of gaseous fuels, control of combustion. Types of liquid fuels, petroleum and its distillation products, coal tar and its distillation products, modified and synthetic fuels, fuels for cryogenic engines. 8

Unit - III

Process calculations: Systems of units. Stoichiometry and composition relations. Material balances, the use of ideal gas laws and vapour pressures, solubility and heat capacity data. 8

Unit-IV

Humidity and solvent recovery. Material balance for various unit operations like absorption, distillation, crystallization etc. 8

Unit-V

Thermochemistry and energy balances. Material and energy balances for typical processes. 8

TOT-401: SOURCES, CHARACTERISTICS & COMPOSITION OF OIL, FAT & WAXES

L : T: P

3 : 1: 0

Unit-I

Natural sources of oils and fats. Statuses of production of commercial oilseeds, oil bearing materials and oils & fats. Position of India in relation to the world production of oilseeds, oils and fats. 06

Unit-II

Deterioration in oilseeds, oil bearing materials and crude oils during their handling and storage. Effects accompanying deterioration and effect of various factors on their deterioration. 06

Unit -III

Commercial oilseeds and vegetable oils, their production, utilization, characteristics and composition: coconut, palm kernel, cocoa butter, cottonseed, peanut, olive, palm, niger-seed, sunflower, safflower, sesame, corn, tobacco-seed, watermelon, rubber-seed, rice-bran, mustard, rape-seed, canola, argemone, linseed, soybean, tung, oiticica, castor, neem, mahua, kusum, karanja, sal, mango kernel etc. 08

Unit -IV

Production, utilization, characteristics and composition of the following: Milk fats and butter, Animal fats, lard, tallow and greases etc. Fish and marine oils: halibut, herring, shark, menhaden, whale, sardine, fish liver oils etc.

Unit -V

Natural waxes, their occurrence, classification and general properties and uses of bees wax, shellac wax, carnauba wax, sugarcane wax, Montana wax, cerecine wax, paraffin wax, jojoba wax, sperm-oil and spermaceti, synthetic waxes. 12

1. To verify Freundlich adsorption Isotherm.
2. To find out the percentage composition of given solution by viscosity measurement with the help of Ostwalds viscometer.
3. To verify Participation or Distribution Law.
4. To determine the rate constant (K) for the hydrolysis of Ethyl Acetate catalyzed by HCl acid.
5. To determine the molecular weight of the given compounds by elevation of boiling point.
6. To determine the molecular weight of the given compounds by depression of freezing point.
7. To determine pH of a solution using pH mater.

TOT-451 OIL CHARACTERISATION LAB

L : T: P
0 : 0 : 6

1. Analysis of oils as per BIS methods for individual oils
2. Identification tests and detection of adulteration in oils and fats.
3. Analysis of oil cakes as per BIS methods:
 - (a) Oil Content
 - (b) Nitrogen Content
 - (c) Moisture Content
 - (d) Crude fiber Content
 - (e) Ash Content
4. Analysis of toxic constituents in oilseed and oilcakes
5. Complete analysis of oilcakes from oilseeds
6. Complete analysis of rice bran and its meal

THU-501: INDUSTRIAL ECONOMICS AND PRINCIPLES OF MANAGEMENT

L : T: P
3 : 1: 0

Industrial Economics:

Unit –I

Introduction : Nature and Significance of economics. Meaning of Science, Engineering and Technology and their relationship with economic development. 4

Unit-II

Basic Concept: The concept of demand and supply. Elasticity of Demand and Supply. Indifference curve analysis, Price effect, Income effect and Substitution .

Unit -III

Money and Banking: Functions of Money. Value of Money, Inflation and Measures to control it. Brief idea of functions of banking system , viz., Commercial and Central Banking.

Management:

Unit -IV

Introduction: Definition ,Nature and Significance of Management. Evaluation of Management thought
Contribution of Max Weber, Taylor and Fay

Unit – V

Human Behaviour: Factors of Individual Behaviour, Perception, Learning and Personality development,
Interpersonal Relationship and Group Behaviour. 10

TCH- : MASS TRANSFER OPERATIONS – I

L : T: P
3 : 1: 0

Unit-I

Basic Principles of mass transfer: Molecular diffusion in fluids, mass transfer coefficients, Interphase mass transfer.

Humidification Operations: Vapour pressure, enthalpy, absolute humidity, dew point, etc., Unsaturated vapour gas mixtures. 8

Unit-II

Gas absorption: Countercurrent, co-current, multistage continuous contact operations. 8

Unit-III

Distillation : Entrainment, pressure drops , flooding , transfer coefficients and relative volatility. McCabe Thiele and Ponchon method for binary component distillation of azeotropes. Flash vaporization and Multicomponent distillation. 8

Unit-IV

Liquid extraction: Concurrent and countercurrent operations in single and multistage solvent extraction, triangular diagrams. 8

Unit-V

Drying: Batch and freeze drying, rotary driers. Surface vs diffusion controlled operations.

Leaching: Design of equipment for above operations. 8

TOT-501 : ESSENTIAL OILS & COSMETICS

L : T: P
3 : 1: 0

Unit -I

General chemistry of essential oil and sources of essential oils. method of their manufacture, different types of essential oil bearing materials. 06

Unit -II

Physico-chemical characteristics of essential oils; Specific gravity, Refractive index, Optical rotation, Solubility, Acid value, Ester value, Analysis of essential oils e.g. free alcohol, Total alcohol, aldehyde and ketone content, Grading and standardization of essential oils, common adulterants and their detection. 08

Unit -III

Production, properties and composition of important Indian essential oils viz. rose, jasmine, khus, sandal wood, keora, palmarosa, lemon-grass, peppermint, lemon, clove oil, orange oil, eucalyptus oil etc. 08

Unit -IV

Important isolates, synthetic perfumery materials and fixatives e.g., menthol, camphor, thymol, geraniol, citral, eugenol, terpeniol, vanillin, coumarins, musk: Natural, Synthetic & Artificial, benzyl acetate, benzyl benzoate etc., Synthesis ;Esters of geraniol, citrionol & terpenols, ionones, Hydroxy citronellol, heliotropins e.t.c. Castor based perfumery chemical, blending of perfumes. 08

Unit -V

Production techniques, functions of ingredients and desirable characteristics of cosmetic products like: Face creams, Face powders, Talcum powders, Hair oil & dyes, Shampoos, Tooth pastes & powders, Shaving creams, Lipsticks, Nail polishes, Depilatories, etc. 10

Reference Book

TOT-502: POST HARVEST TECHNOLOGY OF OIL BEARING MATERIALS**L : T: P
3 : 1: 0****Unit - I**

Introduction to oilseeds of tree origin and other minor oil bearing materials.

Drying of Oilseeds: various methods employed for drying with reference to Indian conditions, types of dryers and their economics. 06

Unit -II

Storage of oilseeds: various method conditions of storage and their effect on oil yield and its characteristics. Grading and evaluation of oilseeds, oil bearing materials and crude oils as per BIS methods. 08

Unit -III

Handling and pre-treatment of oilseeds: machinery employed for handling and pre treatment of oil seeds viz. Conveyors, elevators, seed cleaning machines, decorticators, disintegrators, reduction rolls and high rolls etc. 08

Unit -IV

Machinery employed for production of oils viz. Ghanis, hydraulic presses, screw presses, low pressure and high pressure expellers' etc. Filter presses and centrifuges. 08

Unit -V

Techniques of production of various oils from oilseeds viz. Mustard, rapeseed groundnut, cottonseed, sunflower, sesame, linseed, castor, neem and sal by application of pressure. Techniques of production of oils from coconut,olive, palm and palm kernel. 10

Reference Book

1. Oils & fats Technology by E. Bernardini
2. Neem: A wonder tree by R.K. Suri & Mehrotra
3. Bailey's Industrial Oil and Fat, Part--I -V By Bailey

TOT-503: TECHNOLOGY OF SOAPS & FAT-SPLITTING**L : T: P
3 : 1: 0****Unit-I**

Soaps; cleansing action of soaps; General principles of soap-making, chemistry of cleaning action in soaps. Study of saponification reaction, velocity and temperature. Production of soap base by traditional methods in single vessel, saponification in presence of catalysts and/or at high temperature and high pressure. Raw material for soaps and their selection: role of INS factor, solubility ratio and hardness number, quality specifications and soap making properties of oils and fats. Selection and functions of builders, fillers and other auxiliary raw materials, Upgradation of raw materials including fractionation . 10

Unit-II

Manufacture of household soaps :and toilet soaps from soap base by cold, semi-boiled and full boiled processes. Details of machinery employed and quality specifications with emphasis on effect on quality of milling and plodding, Manufacture of soaps from fatty acids & methyl esters. Analysis of soaps as per BIS standards. 08

Unit-III

Continuous processes of soap manufacture, principles related to the production of extruded soaps-solidification and drying, extrusion homogenization and plastic working. Modern process and plant for the production of household and toilet soaps. 08

Unit-IV

Manufacture of specialty soaps viz. soft soaps, liquid soaps, transparent and translucent soaps, super fatted soaps, medicated soaps, floating soaps, etc. Soap powders like spray-chilled and spray-dried powders. 06

Unit-V

Fat splitting: Hydrolysis of oils and fats; composition of partially split fats. Effect of temperature, pressure, catalyst and ratio of reactants in hydrolysis of fats; degree of splitting; Plants and processes employed for fat splitting: Twitchell process, enzymatic fat splitting, low and high-pressure autoclave processes; semi-continuous and continuous processes of fat splitting. Recovery of glycerine from spent soap lye & sweet water. 08

Reference Book

1. Soaps: Their chemistry & Technology by J.G. Kane
2. Soaps & detergent by K.S. Parasuram
3. Bailey's Industrial Oil and Fat, Part-I by Bailey

TOT-551 : ANALYSIS OF SOAP PRODUCTS

L : T: P
0 : 0 : 6

1. Analysis of household washing and toilet soaps as per BIS:

- (a) Moisture and volatile matter content
- (b) Free alkali
- (c) Total alkali
- (d) Total fatty matter
- (e) Sodium chloride content
- (f) Rosin content
- (g) Glycerol content
- (h) Titre of fatty acids of soaps
- (i) Alcohol soluble & Insolubles
- (k) Identification of fat base

OT-552: OILS AND ALLIED PRODUCTS FORMULATION LAB

L : T: P
0 : 0 : 6

A. Laboratory preparation for the following:

- i. Metallic soaps
- ii. Liquid detergents
- iii. Detergent powders
- iv. Turkey Red Oil
- v. Aluminum Stearate
- vi. Cold Creams
- vii. Vanishing Creams
- viii. Tooth Pastes
- ix. Tooth Powders
- x. Face Powders
- xi. Talcum Powders
- xii. Hair Oils

TCH- : CHEMICAL ENGINEERING THERMODYNAMICS

L : T: P
3 : 1: 0

Unit-I

Basic Concept

The first law and conservation of energy. Applications to steady, nonsteady flow and other engineering problems. The second law. Applications to engineering problems relating to equilibrium, maximum and minimum work. 8

Unit-II

Properties of Pure Substances

Changes in thermodynamic properties and their inter-relationships. The ideal gas. Fugacity and Fugacity coefficients for real gases. 8

Unit-III

Multicomponent System

Partial molal properties. Mathematical models for the chemical potential. Ideal and non-ideal solutions. Activity and activity coefficients. The Gibbs Duhem equations. Excess properties of mixtures. 8

Unit-IV

Phase Equilibria

Criteria for equilibrium between different phases in Multicomponent nonreacting systems. Applications to systems of engineering interest, particularly to vapour – liquid equilibria and solubility. 8

Unit-V

Chemical Equilibrium

The equilibrium constant and the variation of yield in chemical reactions with pressure, temperature and composition. 8

TCH-607 : MASS TRANSFER OPERATIONS –II

L : T: P

3 : 1: 0

Unit –I

Diffusion

Molecular and turbulent diffusion, diffusion coefficient. Fick's law of diffusion, measurement and estimation of diffusivity. Diffusion in multicomponent gas mixtures. Diffusion in solids: Molecular, Knudsen and surface diffusion.

Inter phase mass transfer: Mass transfer coefficients, diffusion between phases, equilibrium solubility of gases in liquids. Mass transfer theories. Mass transfer in fluidized beds. 8

Unit –II

Adsorption and Stripping

Equipments, gas-liquid equilibria, Henry's law, selection of solvent, absorption in tray column, graphical and analytical methods. Adsorption in packed columns. HTU, NTU & HETP concepts, design equations for packed column. 7

Unit –III

Humidification and Dehumidification

Vapour liquid equilibrium and enthalpy for a pure substance, vapour pressure – temperature curve, vapour gas mixtures, definition and derivations of relationships related with humidity, fundamental concept of humidification. Dehumidification and water cooling, wet bulb temperature, adiabatic and non-adiabatic operation, evaporative cooling, classification and design of cooling towers. 7

Unit –IV

Drying

Solid-gas equilibria, definitions of moisture contents, types of batch and continuous dryers, rate of batch drying, time of drying, mechanism of batch drying, continuous drying. 4

Unit –V

Crystallization

Equilibrium yield of crystallization, heat and mass transfer rates in crystallization, theories of crystallization. Classification and design of crystallizers. 4

TOT-601 SOLVENT EXTRACTION OF OILS AND OIL BEARING MATERIALS

L : T: P

3 : 1: 0

Unit-I

Oilseed handling and preparation prior to solvent extraction: cleaning, size reduction, pre-pressing, flaking, extrusion, pelletization, stabilization (for rice bran), dehulling etc. Plants & Processes and the machinery and equipments used. 08

Unit-II

Solvent extraction: Theory, solvents and their availability, selection of solvents, advantages and limitations, properties of different solvents. Solvent extraction techniques: Batch and continuous plants and processes employed for solvent extraction of low and high oil bearing materials. Effects of operating parameters on the quality of oil and meal after de-solventization of miscella and meals. 08

Unit-III

De-solventization of meals: Equipments and plants employed, current trends with comparison of each.

Solvent losses and utility requirements, energy conservation. Safety and environmental consideration of solvent extraction plants & solvent recovery systems. 08

Unit-IV

Alternative solvents of oils extraction; their principle and comparison with conventional solvents. Use of super critical fluid and liquefied gases for oilseed extraction and oleoresin preparations, HCF extraction, Aqueous extraction. Enzymatic extraction. 08

Unit-V

Practices of solvent extraction for the oil bearing materials: Soybean, rice-bran, groundnut, cottonseed, sunflower, mustard/rape-seed and expeller cakes. Rendering of animal fats: Different methods of rendering, production of tallow, lard, fish oils and fish liver oils. De-toxification of oil meals, protein products; protein isolates, concentrates and hydrolysates, Detoxification of proteins. 08

Reference Book

1. Solvent extraction of vegetable oil by Parikh
2. Bailey's Industrial Oil and Fat, Part--I -V By Bailey

TME- : MACHINE DESIGN

L : T: P
3 : 1: 0

Unit-I

Introduction to the methodology of Engineering design; Design circle for a product/ system; Important considerations in design; Formulation of design concepts; Miscellaneous considerations like wear, environmental, human and aesthetic aspects; Ergonomics considerations. 8

Unit-II

Estimation of design load under static and dynamic conditions; Design for safety; Stress concentration and its effect and its prevention; Consideration of creep, fatigue and thermal stresses in design. 8

Unit-III

Material selection in design; Important engineering materials- Their classification and properties; Elementary idea of rubber, plastic ceramics and composites; Advantages over conventional metals and alloys. 8

Unit IV

Design of power transmission systems- belt, pulley and shafts; Design of riveted and welded joints; Design of keys, couplings, lever and brackets. 8

Unit-V

Design of pressure vessels- thick and thin cylinders, pipe and joints; Elementary ideas and importance of computer aided design; Basics of computer graphics - general introduction to AutoCAD. 8

TOT-602: REFINING OF OILS

L : T: P
3 : 1: 0

Unit-I

Impurities of crude oils: Effect of refining and other processing on specific impurities. Degumming of oils and fats: Mechanism of degumming, various methods employed for degumming, super-degumming, batch and continuous methods of degumming, degumming processes for specific oils, recovery of lecithin from gums; De-sliming. De-waxing of oils: Principle and methods of de-waxing of individual oils. Destearinisation of oils (Production of low cloud point oils). 08

Unit-II

De-acidification of oils and fats: De-acidification by alkalis e.g. caustic soda and sodium carbonate; batch and continuous methods; refining losses; effect of operating variables on chemical refining; liquid-liquid extraction esterification etc. and their limitations; miscella refining; de-acidification by Zenith process. Physical refining of oils: Batch, semi-continuous and continuous methods, principle of major types of continuous process, their merits and demerits, Principles, effect of variables on loss and quality of oil. 08

Unit-III

Treatment and disposal of soap stock: Batch and continuous methods. Bleaching of oils and fats: Theory of adsorption bleaching; components responsible for oil color; chemical and physical characteristics of various bleaching agents; activated bleaching earth and activated carbon and their methods of manufacture, determination of bleachability and bleaching efficiency of adsorbents, batch and continuous methods of bleaching by adsorption; effect of operating variables on quality of bleached oil, recovery of oil from spent bleaching agents, filtration techniques for removal of spent bleaching agents from bleached oils, chemical bleaching; color fixation in oils and fats-reasons and remedies. 10

Unit-IV

Deodorization of oils: Components responsible for odor and their properties; principle of deodorization, batch and continuous methods of deodorization; effect of operating variables; deodorization losses, commercial deodorizer design, thin film deodorization, vacuum systems and their applications. 08

Unit-V

Energy conservation in oil processing industry. Treatment of effluents from oil processing industry. Membrane processing of crude vegetable oils: degumming, de-acidification and bleaching. Biotechnology: Principle and its application in oil and fat processing. Processing & utilization of refining By-products. 06

Reference Book

1. Technology and refining of oil and fats by T.L. Mahatta
2. Bailey's Industrial Oil and Fat, Part--I -V By Bailey

CH-655 : CHEMICAL ENGINEERING OPERATION LAB

L : T: P
0 : 0 : 3

1. Studies on Jaw Crushers, Hammer mill, Ball Mill, Crushing Rolls
2. Screen Analysis
3. Pressure Drop studies in pipe fittings
4. Studies on Rotameter, Orifice meter, venturi meter and V – Notch.
5. Studies on sedimentation and filtration.
6. Studies on Heat Exchangers viz. Concentric pipe heat exchanger, Shell and tube heat exchanger.
7. Studies on Single effect/ Multiple effect evaporators.
8. Studies on Bubble cap/ tray/ fractional column.
9. Studies on Absorption/ Humidification/ Dehumidification columns.
10. Studies on extraction column.

OT-651: DETERGENT PRODUCTS PREPARATION AND LAB

L : T: P
0 : 0 : 6

1. Preparation of acid slurry,
2. Preparation of Detergent powder
3. Preparation of Liquid detergents
4. Analysis of synthetic detergent powders as per BIS
 - (a) Active matter content and its type
 - (b) Moisture and volatile matter content
 - (c) Matter insoluble in water
 - (d) Matter insoluble in alcohol

- (e) Active alkalinity
- (f) Total phosphate content
- (g) Sodium poly phosphate content
- (h) Chloride content
- 5. Analysis of alkyl benzene sulphonic acid as per methods of BIS
 - (a) Active matter
 - (b) Free LAB
 - (c) Sulphuric acid content
- 6. Determination of performance characteristics of surfactants and detergent products:
 - (a) Foaming power
 - (b) Dispersing power
 - (c) Relative detergency
 - (d) Surface tension and Interfacial tension

TOT-652 SEMINAR

L : T: P
0 : 0 : 3

The student will be required to prepare and deliver a seminar as well as submit a written report on the topic assigned to him/her

TOT-701 MODIFIED OILS AND FATS

L : T: P
3 : 1: 0

Unit-I

Hydrogenation of oils: Theory and importance of hydrogenation, kinetics of reaction, operating variables and their effect on rate of hydrogenation, selectivity and isomer formation. 08

Unit-II

Commercial plants and processes employed for hydrogenation of oils and fats. Design of hydrogenating vessels, Hard oils for industrial applications e.g. soaps, lubricating greases etc. Manufacture of shortening, margarine, butter, bakery and confectionery fats: shortening and cocoa butter substitute by interesterification. 10

Unit-III

Hydrogenation catalysts: Theory of catalyst structure, catalyst poisons and promoters, theory of catalysis, properties of catalysts e.g. porosity, selectivity, activity and other properties, different types of catalysts employed for hydrogenation of oils and fats, methods of catalyst manufacture, reclamation and regeneration of catalyst from spent catalyst. Manufacture of hydrogen: Various methods of production and its purification for hydrogenation purposes, storage of hydrogen and handling of by-products of hydrogen production. 10

Unit-IV

High-pressure hydrogenation for production of fatty alcohol; conjugated hydrogenation. Hydrogenation of fatty acids: importance of operating variable and feed stock purity, batch and continuous methods. 06

Unit-V

Quality control of modified fats, dilatometry- theory and practice, Trans unsaturated fatty acids and polyunsaturated fatty acids in nutrition and health. Energy conservation in hydrogenation process, Frying & stability characteristics, nutrition & health aspects, Interesterification, fractionation and blending, Diacylglycerols as low calorie fats. 06

Reference Book

1. Bailey's Industrial Oil and Fat, Part-I -V By Bailey
2. Hydrogenation of oil & fat by H.B.W. Patterson

TOT: 702 SURFACTANTS & SYNTHETIC DETERGENTS

L : T: P
3 : 1: 0

Unit-I

Surface active agents: Theory of surface action; effect and behavior of surface active agents on the of interfaces involved in a system e.g., solids liquid, gas-liquid, liquid-liquid and interfaces formed by three phases e.g. solids, liquid and gas and two immiscible liquids. Anionic surfactants: sulfated and sulfonated surfactants e.g. sulfated oils, alkyl sulfates, alkyl ether sulfates, sulfated mono-glycerides, alkyl glyceryl ether sulfonates, sulfated alkanolamides, ester and amide sulfonates, sulfonated poly-carboxylic acid surfactants, alkyl aryl sulfonates, olefin sulfonates,

mahogany and petroleum sulfonates and other miscellaneous anionic surfactants. Cationic surfactants: Non-quaternary nitrogen basis e.g. amines, nitriles and their derivatives: quaternary nitrogen basis and miscellaneous cationic surfactants. Nonionic surfactants: Poly-ethoxy ethers and esters and poly-hydroxy nonionic surfactants. Amphoteric surfactants , Biosurfactants. 12

Unit-II

Bulk properties of surfactant solutions and methods of their measurements: micelle properties; foaming; wetting and related gross effects; emulsification, dispersion; and detergency; measurement of critical micelle concentration; foaming power and foam stability, wetting power, emulsifying power, stability of dispersion and detergency. 06

Unit-III

Plants and processes employed in the manufacture of anionic surfactants viz. alcohol sulfates, alkyl aryl sulfonates, olefin sulfonates, sulfated and sulfonated oils, alpha methyl esters etc., nonionic surfactants viz. Poly-ethoxy ethers and esters, poly-hydroxy surfactants etc. and cationic surfactant e.g. quaternary ammonium compounds. 10

Unit-IV

Inorganic and organic builders and fillers used in the manufacture of synthetic detergents and their functions. Various physical forms of synthetic detergents: Solid, liquid, and non/liquid forms. Manufacture of household synthetic detergents: Plants and processes employed for manufacture of powder, liquid and cake soaps. 08

Unit-V

Analytical techniques employed for analysis of synthetic detergents and surfactants as per BIS Methods. Biological effects and toxicity of surfactants. 04

Reference Book

1. The manufacture of soaps other detergents and glycerin by Edgar Woollatt
2. Synthetic detergent by Milwidsky
3. Soaps & detergent by K.S. Parasuram

TCH- : INSTRUMENTATION AND PROCESS CONTROL

L : T: P

3 : 1: 0

Unit-I

Elements of measurement , functions and general classifications of measuring instruments. Indicating and recording type of instruments. Elements of measuring instruments, static and dynamic characteristics of measuring instruments. 6

Unit-II

Principle of operation, construction and application of important industrial instruments for the measurement of temperature, flow, liquid level and composition. 10

Unit-III

Dynamic behavior of first order, second order and two or more first order systems in series. 10

Unit-IV

Block and physical diagrams of control system. Open and closed loop control systems. Characteristics of measuring elements, controllers and final control elements. Mods of control actions. (08 lectures)

Unit-V

Response of closed loop control systems for various kind of control actions and measurement lag. 6

TCH-707: CHEMICAL REACTION ENGINEERING

L : T: P

3 : 1: 0

Unit-I

Chemical Reactions : Rate of chemical reactions, variable affecting the reaction rate, order of reaction , reaction rate constant , elementary and non-elementary reaction mechanism. Arrhenius equation, Collision theory and theory of absolute reaction rates, predictability of reaction rate. 8

Unit-II

Kinetics of homogeneous chemical reactions, rate equations for simple and complex reactions, irreversible reaction, parallel reactions, consecutive reactions, auto catalytic reactions and homogeneous catalytic reactions. 8

Unit-III

Interpretation of reactor data in constant volume and variable volume batch reactions, integral and differential method of following kinetic data. 6

Unit-IV

Classification of chemical reactions, Interpretation of reactor data in flow reactions. Reactor designs for homogeneous, batch, semi-batch, plug flow and continuous stirred tank. Electrochemical reactors. Isothermal as well as non-isothermal operation, space velocity and residence time in flow reactors. Size comparison of single reactors like batch, plug flow and CSIR for first and second order single reactions. Multiple reactor systems, Plug flow reactions in series and for parallel equal sized CSTR's in series. 10

Unit-V

Catalysts: Preparation, activity and the factors which influence it. The effect of physical properties such as surface area and pore size etc. on catalyst activity, methods of determination of their physical properties, catalyst poisoning, Biocatalysis. Heterogeneous catalytic reactions, principles, absorption isotherms, kinetics of solid catalysed fluid reactions, rate-controlling steps. Use of computers in designing, modeling, optimization and simulation of chemical process. 8

TOE- : OIL TECHNOLOGY

L : T: P

3 : 1: 0

Unit-I

Introduction to oils & fats, types of glycerides, theories of glyceride structure, determination of glyceride structure, non-glyceride components of oils, component fatty acids of oils & fats. 08

Unit-II

Chemical reactions of oils & fats and their industrial importance, physico-chemical characteristics of oils & fats, classification of oils, adulteration of oils. (08 Lectures)

Unit-III

Post harvest technology of oilseeds, handling and storage of oilseeds, different methods for extraction of oils from oil-bearing materials. 08

Unit-IV

Degumming, deacidification, bleaching hydrogenation, deodorization and physical refining. 08

Unit-V

Saponification of oils, different methods of soap manufacture, selection of raw materials, analysis of soaps. Types of surfactants and fat based surfactants. 08

Reference Book

1. Bailey's Industrial Oil and Fat, Part--I -V By Bailey
2. Synthetic detergent by Milwidsky
3. Oils & fats Technology by E. Bernardini

TOT-751: OIL PROCESSING LAB

L : T: P

0 : 0: 3

1. Laboratory degumming of vegetable oils
2. Laboratory refining(alkali neutralization) of vegetable oils
3. Laboratory bleaching of vegetable oils
4. Analysis of processed oils and other oil products:
 - (a) Soap content of neutralized and washed oils.
 - (b) Phosphatide content of vegetable oils
 - (c) Iron content of vegetable oils
 - (d) Wax content of vegetable oil
5. Analysis of waste and by products:
 - (a) Acid oil

- i) Neutral oil
- ii) Acidity
- (b) Soap stock
 - i) Neutral oil
 - ii) Total fatty matter
- 6. Analysis of bleaching earth, activated carbon and nickel catalyst
- 7. Determination of fatty acid composition and detection of adulteration by Chromatographic techniques.
- 8. Laboratory hydrogenation of Oils
- 9. Interesterification of Oils. (M.P.)
- 10. Fractionation of Oils

TOT-752: PROJECT (Term Work)

L : T: P

3 : 1: 0

The student (s) will be required to search literature pertaining to design of an equipment / processing of a food commodity / production of food product, comprehend it and prepare a report for assessment.

TOT-753 : INDUSTRIAL TRAINING

L : T: P

0 : 0 : 3

The student(s) will be required to undertake training in the food industry after III B. Tech.VI semester for a specified period and submit its report after completion for evaluation and oral examination in the VII semester of his studies in Final B.Tech.
